**PRODUCT/AREA:** Print

Subject: F Panel with Fargo HDP5000

To define layout elements to be printed with the F Panel please do the following:

Under cardPresso's menu **CP -> Print Settings** select your HDP 5000 printer and configure the **Overlay** options as highlighted in the print screen below (Side determines whether the F Panel will be used on the Front or Back of the card).

This will cause the **Overlay** tab to be accessible on the bottom left corner of the screen.

Here you'll be able to design the layout to be printed using the F Panel. When that's concluded, return to the **Design** tab and proceed with the print job.
