TECHNOTE | PAG. 1/ 3

Now, while in the **View Card Front** window you'll see in the bottom left corner of the screen the **Design|Overlay/Varnish** page selector.

In **Design** you'll be able to customize your card's layout. In **Overlay/Varnish** you may now customize the Overlay design using the tabs on the right side of the screen.

After the Overlay design is done, save the .bmp file through the 3 dots (**...**) button on the File option.

Use the **Advanced Options** button under cardPresso's menu **File** -> **Print Settings** to access the printer driver, locate the UV Panel Settings window and browse your computer for the previously created file.
